PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building scalable, high-performance web applications using Laravel, React.js, and Node.js. Specialized in REST API development, multi-tenant SaaS systems, ERP/CRM platforms, and database optimization. Proven ability to deliver enterprise-level solutions supporting 500+ concurrent users with optimized performance and secure authentication.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend: Laravel, PHP (OOP/MVC), Node.js

Database: MySQL, Oracle, MongoDB, PostgreSQL

APIs: REST API Development, API Integration, Stripe, PayPal

DevOps: AWS (EC2, S3, RDS), cPanel, Docker, CI/CD Pipelines

Tools: Git, GitHub, Postman, VS Code, Jira

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer – Hamdard University

May 2024 – Present

- Developed a nationwide Q-Bank system used by 500+ users across multiple campuses
- Built ERP modules (HR, Payroll, Finance) improving operational efficiency by 40%
- Designed Role-Based Access Control (RBAC) system with 100+ roles and JWT-based secure authentication
- Optimized database queries reducing average page load time by 35%

Full Stack Developer – Kdys Lab

Aug 2023 – May 2024

- Built scalable eCommerce and CRM systems processing 1,000+ records daily
- Developed and documented REST APIs; integrated Stripe and PayPal payment gateways
- Implemented background job queues improving system throughput by 30%
- Worked on Node.js backend services for API handling and asynchronous tasks

PHP Laravel Developer – Midline Presence

Apr 2022 – Aug 2023

- Built and maintained REST APIs consumed by web and mobile applications
- Managed AWS infrastructure deployments (EC2, S3, RDS)
- Optimized complex SQL queries improving reporting speed by 25%

Junior Laravel Developer – DivsnPixel

Oct 2021 – Apr 2022

- Developed backend modules and REST APIs for client-facing applications
- Implemented role-based access control (RBAC) systems to secure application data

KEY PROJECTS

ERP System: Multi-module ERP with HR, Payroll, and Finance modules built with Laravel and MySQL.

SaaS Dashboard: Multi-tenant SaaS platform supporting multiple organizations with isolated data environments.

eCommerce Platform: Full-featured online store with product management, cart, and payment gateway integration.

CRM System: Lead management, pipeline tracking, and reporting system for sales teams.

CMS Platform: Dynamic content management system with role-based publishing workflow.

KEY ACHIEVEMENTS

- Delivered enterprise-grade systems actively used by 500+ users
- Improved application performance by up to 40% through query and architecture optimization
- Designed and deployed scalable multi-tenant SaaS architectures on AWS

EDUCATION

BS Computer Science – 2022

ACCP-Pro Software Engineering – 2018
